

- A comprehensive and reliable solution for smart meter engineers.
- Equipped with all the necessary tools to ensure safe installation procedures.
- Voltage Indicator boasts with ghost voltage suppression and HiZ/LoZ indication for convenient testing.
- Voltage and Phase Finder comes with visual and audible heartbeat to indicate correct functioning.
- SP400 Professional Proving Unit delivers genuine AC output with bright LED indication.
- Non-Contact Voltage Detector operates with a range of 50-1000V AC and is CAT IV rated for earth protection.
- SOK32 Socket Tester detects up to 17 different faults.
- Safe Case is designed for easy and safe transportation of the kit.
- Tailored to meet the specific safety needs of smart meter engineers at every inspection.

## Description

The Socket & See Smart Meter Installation Kit is a complete and comprehensive solution for smart meter engineers. The kit includes all the essential tools for safe installation procedures, including the VIP ESI 2-Pole Voltage Indicator, EPF PRO Hazardous Voltage and Phase Finder, SP400 Professional Proving Unit, VVD PRO Non-Contact Voltage Detector, SOK32 Socket Tester, and Safe Case Soft Carry Case.

The VIP ESI 2-Pole Voltage Indicator has automatic ghost voltage suppression and HiZ/LoZ indication for glow testing, and features interchangeable prods, making it easier to test in awkward situations.

The EPF PRO Voltage and Phase Finder has a visual and audible heartbeat to indicate that the batteries and electronics are working correctly, while the SP400 Professional Proving Unit provides a true AC output with ramp-up and down features and bright LED indication. The VVD PRO Non-Contact Voltage Detector has an operating range of 50 - 1000V AC and is CAT IV rated 1000V to earth, while the SOK32 Socket Tester displays the correct wiring conditions and 17 other fault conditions. The Safe Case Soft Carry Case houses all

the components of the kit and includes a transparent front pocket for the SP400 Proving Unit, a detachable neck strap, and a belt loop for easy transportation while on site.

Overall, the Socket & See Smart Meter Installation Kit offers a reliable and safe solution for smart meter engineers, with each component designed to meet their specific needs. Engineers can ensure safe isolation procedures are carried out at every inspection with this kit.
